Work Experience

Project Manager

FurryCanva LLC - California City, CA
March 2016 to Present

Rapidly switched between technical and project management skills to supplement technical team to provide greater migration throughput and team capacity
Managed communications between key customer stakeholders and the technical team
Wrote technical documentation to provide team members the ability to utilize automation scripts
AR/VR/MR application development
Blockchain application development for payment processing and monitoring supply chains
iPhone/iPad/Android application development using Swift/React Native/Flutter and XCode/Android Studio with successful applications released to the App/Play Store
Lead the development of applications with JavaScript frameworks and libraries that support efficient web development using MERN (MongoDB, Express.js, React.js, Node.js), and other libraries
Developed interactive web applications using Google, Netflix, Amazon, and other APIs
Created multiple Power BI, Tableau, and Qlik Dashboards for senior executives and application owners using KPIs
Customize and tailor dashboards to meet client needs risk and accounting management needs using Power BI, Tableau, and Qlik
Generated data and business analytic models, with Power BI, Tableau, and Qlik
Created functions and algorithms to clean data
Developed and executed network safety and security, and database protocols

Web Mobile Full-Stack Developer (Contract)

CommerceLabs - United States
February 2015 to November 2016

From prototyping, developing, testing, and iterating our core mobile & web ordering product to the unique challenges in maintaining a white labeled application to be used by thousands of clients, my engineering experience here has been filled with a lot of fun problems in scalability and architecture.

Mobile Application Developer (Internship)

Gigster - San Francisco Bay Area, CA
January 2014 to September 2014

During the summer of 2014, I had the opportunity to intern for the Gigster. The Gigster is a venture development group that provides technology and business services for new startups. My internship consisted of iOS development for our team's project, The Dime Club, where I developed and tested main user flows using Objective-C and XCTest!

Education

Master of Project Management in Project Management

CARITAS INSTITUTE OF HIGHER EDUCATION

Additional Information

Freelance mobile / web developer specializing in small to large sized business application & websites and content management systems. I design and develop responsive websites using the most current technologies to provide the best user experience while satisfying customer needs.

My previous employment and management experience provide me with leadership skills. It also has provided me the knowledge of understanding and communicating with customers to satisfy their needs.

I am a fast learner who enjoys challenges and thrives in a fast paced.

Currently I have experience working with Java, Objective-C, Swift, HTML, CSS, PHP, MERN & MEAN

And extensive experience with both relational & non-relational databases (MySQL, MariaDB, MongoDB, PostgreSQL, NoSQL, DynamoDB)

I love creating websites and mobile apps, especially interested in working on web applications and tools.

- WordPress custom theme and plugin development

- Mobile application development for both iOS & Android using React Native, Xcode, Android Studio
- Advance experience in custom PHP, MySQL, Bootstrap, jQuery, Ajax
- Perfect skills with AngularJS, ReactJS, Vue.js, NodeJS, Python / Django, Laravel, Ruby on Rails
- Experienced on SEO and an expert on social media marketing and management.
- Very capable on BUG-FIXING and Tweaks of any kind. Able to work on any kind of environment since I am used to most of CMS platforms, almost web hosting providers
- Fluent in English, so communication will never be an obstacle on getting the job done very well.

I am looking for long term challenging work.
